

# Multiplication

Skills	Concrete	Pictorial	Abstract
<p><b>Doubling</b></p> <p>double, doubling, is, equals, add</p>	<p>Use of practical resources to show how to double a number</p>  <p>double 4 is 8 <math>4 \times 2 = 8</math></p>	<p>Draw pictures to show how to double a number</p> <p>Double 4 is 8</p> 	<p>Encourage number sentences and mental calculations.</p> <p><math>4 + 4 = 8 \rightarrow 4 \times 2 = 8</math></p> <p><i>*End of YR target*</i></p>
<p><b>Counting in multiples</b></p> <p>multiple, sequence, groups, lots of, groups of</p>	<p>Counting in multiples supported by concrete objects in equal groups.</p> 	<p>Use of a number line or pictures to continue support in counting in multiples.</p> 	<p>Count in multiples aloud.</p> <p>Write sequences with multiples of numbers.</p> <p>2, 4, 6, 8, 10</p> <p>5, 10, 15, 20, 25</p> <p><i>*End of Y1 target*</i></p>
<p><b>Repeated grouping/repeated addition</b></p> <p>grouping, equal, part, equal, repeated addition</p> <p>How many times?</p>	<p><math>3 \times 4</math> <math>4 + 4 + 4</math> There are 3 groups, each with 4 in them</p> 	<p>Children to represent the practical resources in a picture and use a bar model.</p> 	<p><math>3 \times 4 = 12</math> <math>4 + 4 + 4 = 12</math></p> <p><math>4 \times 3 = 12</math> <math>3 + 3 + 3 + 3 = 12</math></p>

# Multiplication

<p><b>Number lines to show repeated groups</b></p> <p><i>multiply, multiplied by, times, steps, equal</i></p>	<p><b>3 x 4</b></p> <p>Cuisenaire rods could also be used.</p>	<p>Abstract number line representing the three groups of four.</p> 	<p>Abstract number line showing three jumps of four.</p> <p><math>3 \times 4 = 12</math></p> 						
<p><b>Use arrays to illustrate commutativity</b></p> <p><i>array, commutative, repeated addition, row, column</i></p>	<p>Counters, objects, Numicon pegs and other objects can be used.</p> <p><math>2 \times 5 = 5 \times 2</math></p>  <p>2 lots of 5      5 lots of 2</p>	<p>Children to represent arrays pictorially.</p> 	<p>Children to be able to use an array to write a range of calculations, e.g:</p> <p><math>10 = 2 \times 5</math>  <math>5 \times 2 = 10</math>  <math>2 + 2 + 2 + 2 + 2 = 10</math>  <math>10 = 5 + 5</math></p> <p><i>*End of Y2 target*</i></p>						
<p><b>Partition to multiply</b></p> <p><i>partition, tens, ones, value, times, derive, product, scale up, commutativity, associativity</i></p>	<p>Partition to multiply using Numicon, Base 10 or Cuisenaire rods.</p> <p><math>15 \times 4</math></p>  <p>What is the calculation? What is the product?</p> <table border="1" data-bbox="291 1308 593 1444"> <thead> <tr> <th>100s</th> <th>10s</th> <th>1s</th> </tr> </thead> <tbody> <tr> <td></td> <td>  </td> <td>  </td> </tr> </tbody> </table>	100s	10s	1s				<p>Children to represent the manipulatives pictorially.</p> 	<p>Children should be encouraged to show their process:</p> <p style="text-align: center;"><math>4 \times 15</math>  <math>\swarrow \searrow</math>      10 5</p> <p><math>10 \times 4 = 40</math>  <math>5 \times 4 = 20</math>  <math>40 + 20 = 60</math></p> <p>A number line might be used alongside.</p> 
100s	10s	1s							
									

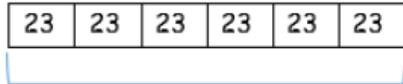

# Multiplication

<p><b>Multiplying two-digit numbers by one-digit numbers</b></p> <p><i>partition, place value</i></p>	<p>Using place value counters (Base 10 could also be used).</p> <p><math>23 \times 3</math></p> 	<p>Children represent the place value counters pictorially.</p> 	<p>Children record their process to show their understanding.</p> $\begin{array}{r} 3 \times 23 \\ 20 \quad 3 \end{array}$ $\begin{array}{r} 3 \times 20 = 60 \\ 3 \times 3 = 9 \\ 60 + 9 = 69 \end{array}$ <p>Grid method can also be used here.</p> $\begin{array}{r} 23 \\ \times 3 \\ \hline 69 \end{array}$ <p><b>N.B. See Written Methods page</b></p>
<p><b>Formal written method</b></p> <p><i>Carrying, place holder,</i></p>	<p>Using place value counters (Base 10 could also be used).</p> <p><math>23 \times 6</math></p> 	<p>Children to represent the counters/ Base 10 pictorially.</p> 	<p><math>6 \times 23 =</math></p> $\begin{array}{r} 23 \\ \times 6 \\ \hline 138 \end{array}$ <p><b>N.B. See Written Methods page</b></p> <p><i>*End of Y3 target*</i></p>

# Multiplication

## Conceptual Variation:

$6 \times 23$

?

Mai had to swim 23 lengths, 6 times a week.

How many lengths did she swim in one week?

With the counters, prove that  $6 \times 23 = 138$

Find the product of 6 and 23

$6 \times 23 =$

$\square = 6 \times 23$

$$\begin{array}{r} 6 \quad 23 \\ \times 23 \quad \times 6 \\ \hline \end{array}$$

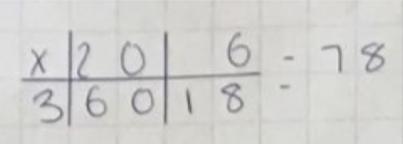

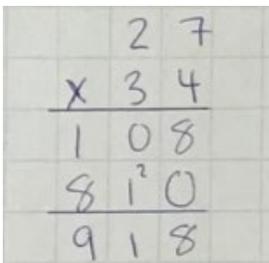

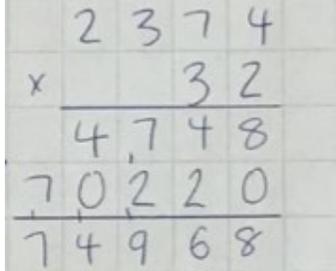

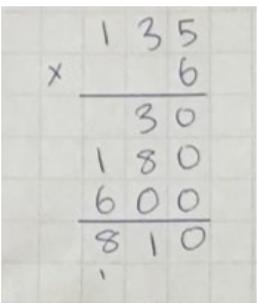

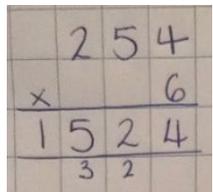

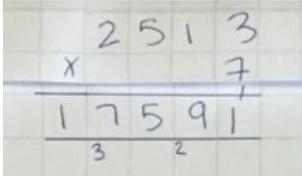

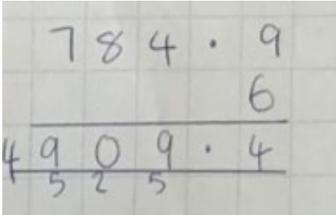

## Mental Strategies:

- Counting in multiples
- Repeated addition
- Arrays
- Links to doubling, including doubles to link  $\times 2$ ,  $\times 4$  and  $\times 8$  tables
- Reorder calculation (**commutative**)
- Using known facts and place value
- Use the rule of **associativity**
- Scaling up using known facts
- Using the relationship between multiplication and division
- Use partitioning and **Distributive Law** to multiply
- Use **factor pairs** and the **Associative Law** to multiply
- Recognise and use square and cube numbers

# Multiplication

## Written Methods of Multiplication

N.B. Written abstract methods must only be used once children have a secure understanding of the operation and place value.

<p><b>1. Grid method</b> 26 x 3</p>  <p>60 + 18 = 78</p>	<p><b>4. Long multiplication</b> 27 x 34</p>  <p>2374 x 32</p> 	<p><b>Teaching Point</b></p> <p>Make place value explicit!</p> <p>Ensure children understand that they are multiplying by 30 not 3. We know that all multiples of 10 end in a 0, therefore we can apply that before we start.</p> <p><i>*End of Y5 target*</i></p>
<p><b>2. Expanded form</b> 135 x 6</p> 	<p><b>Teaching Point</b></p> <p>Ensure children quickly progress to compact – don't keep them at this step for long.</p>	<p><b>Teaching Point</b></p> <p>Ignore D.P to start. Complete sum as learned previously, then count the DP back in e.g. 1 D.P in Q = 1 D.P in A. Place value can appear confused, when multiplying by larger digits but including the 0 makes the calculation unnecessarily complex.</p> <p><i>*End of Y6 target*</i></p>
<p><b>3. Compact form</b> 3-digit x 1-digit – 254 x 6</p>  <p><i>*End of Y4 target*</i></p> <p>4-digit x 1-digit – 2513 x 7</p> 	<p><b>5. Multiply decimals by integers</b> 784.9 x 6</p>  <p>47.3 x 62</p>
